00:48:11 Martin Sutcliffe: please type any questions for Oliver here

00:57:17 Lawrence Brown: Great team up here at Roslin Institute and brand new Aquaculture Genetics Research Facility with disease challenge unit if seeking support with breeding programmes and genetic improvement for disease resilience.

00:59:48 I\_cocker: There is £100million government funding for the UK seafood sector in the pipeline - expecting news this summer

01:00:35 Keith: Cefas staff working with roslin on these issues

01:05:38 Kimberly Cullen: Parliamentary questions. 14 June 2021.

To ask the Secretary of State for Environment, Food and Rural Affairs, with reference to the Prime Minister's statement on EU negotiations: 24 December 2020, to whom the £100 million funding for the British fishing fleet has been allocated.

Victoria Prentis The Parliamentary Under-Secretary of State for Environment, Food and Rural Affairs The Government has announced that £100 million will be made available across the UK for the best transformative seafood projects that will rejuvenate the industry and our coastal communities.

Options for the funding are currently being explored, but key areas for investment are likely to be infrastructure projects that support the development and modernisation of ports, harbours, and landing sites across the UK; the development and roll out of science and innovation across the catching and processing sectors; and the training required to ensure the workforce has the right skills, capacity, and expertise, alongside initiatives to encourage

01:06:58 Kimberly Cullen: To explain chat message above. Minister Prentis was asked to further detail the £100 million. Her response is above.

01:07:14 Martin Sutcliffe: Excellent thanks Kim! Very helpful

01:07:29 Kimberly Cullen: And to finish her response as I didn't copy the entire text:

01:07:32 Kimberly Cullen: Options for the funding are currently being explored, but key areas for investment are likely to be infrastructure projects that support the development and modernisation of ports, harbours, and landing sites across the UK; the development and roll out of science and innovation across the catching and processing sectors; and the training required to ensure the workforce has the right skills, capacity, and expertise, alongside initiatives to encourage new entrants into the sector. More detail on this funding will be made available in due course.
